Re: *Amendment of Part 27 of the Commission's Rules to Govern the Operation of Wireless Communications Services in the 2.3 GHz Band* (WT Docket No. 07-293) and *Establishment of Rules and Policies for the Digital Audio Radio Satellite Service in the 2310-2360 MHz Frequency Band* (IB Docket No. 95-91)

NOTICE OF ORAL EX PARTE PRESENTATION

Dear Ms. Dortch:

I am writing pursuant to Section 1.1206(b)(2) of the Commission's Rules to notify the Commission that yesterday, Jennifer McCarthy of NextWave Broadband, Inc., Ron Olexa of Horizon Wi-Com, Mary O'Connor of Wilkinson Barker Knauer, and I met on behalf of the WCS Coalition with Renee Cittendon, Legal Advisor to Commissioner Clyburn, to discuss the issues pending in the above-referenced proceedings regarding the coexistence of Satellite Digital Audio Radio Service terrestrial repeaters and Wireless Communications Service broadband systems in the 2305-2360 MHz band. The parties discussed the July 2009 demonstration conducted in Ashburn, VA, that it has been nearly a year since the draft order resolving the above-referenced proceedings began circulating for Commission vote, and it is time to bring these proceedings to conclusion so as to expedite the provision of needed broadband services in the 2.3 GHz band to Americans. The WCS Coalition also distributed the attached documents during the meeting.

Pursuant to Sections 1.1206(b)(2) and 1.49(f) of the Commission's Rules, this letter is being filed electronically with the Commission via the Electronic Comment Filing System. Should you have any questions regarding this presentation, please contact the undersigned.

Respectfully submitted,

/s/ Paul J. Sinderbrand

Paul J. Sinderbrand
Counsel to the WCS Coalition

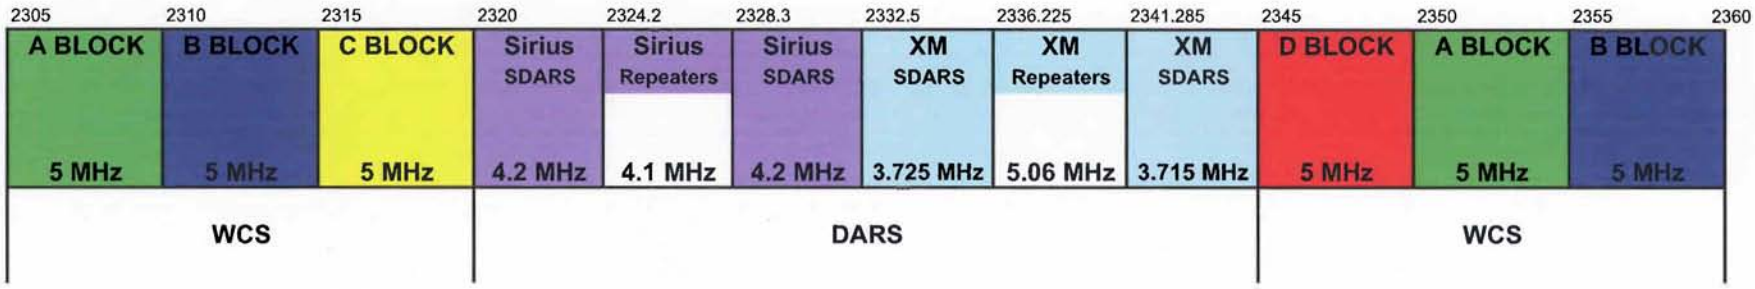
WCS/DARS BANDPLAN



The Sun, The Moon And The Stars Must Align For Interference To Occur

The risk of OOBE interference from a WCS mobile to a DARS receiver is probabilistic

- Are WCS device and DARS receiver in close proximity?
- What service is the DARS receiver subscribed to?
- Is the DARS device receiving?
- Is DARS receiver served by terrestrial repeater?
- Is WCS device transmitting?
- What frequency block is WCS transmitting on?
- At what power is WCS device transmitting?
- Are there obstructions between transmitter and receiver?
- Are both devices stationary?
- Do WCS antenna and DARS antenna have high degree of mutual coupling?
